

WRAP FORMULA:

Height \_\_\_\_\_ Measure front cover plus 1"  
Length \_\_\_\_\_ Measure around the book, overlapping  
tape measure to center of front cover.

If you are using prequilted fabrics, you may cut them to the exact sizes you measured. If you will be quilting your own fabrics, add 1" to each measurement to allow for quilting distortion. Trim to proper size when quilting and pressing are finished.

Large flap width \_\_\_\_\_ (Half the width of the front cover plus 1")

Binding: Add height and length measurements. Multiply times two. Add 10" for seams and corners.

$(H \text{ \_\_\_\_} + L \text{ \_\_\_\_}) \times 2 + 10" = \text{total length of bias strips to cut.}$
