

Oops, you cut all your fabric into 1½” strips and now you don’t have enough fabric to make 1½” half-square-triangles, and you can’t find Thangles™? Try this.

1. Lay the two fabrics right sides together.
2. Carefully mark a 45° sewing line from one corner.
3. Mark a 45° cutting line ¼” from the sewing line.
4. Mark another 45° sewing line ¼” from the cutting line.
5. Stitch on both sewing lines.
6. Trim at bottom of lower stitch line, 90° across fabric.
7. Cut on marked diagonal between stitching lines. Press each piece open.

You should now have two 1½” half-square-triangles. Repeat as needed.
